Take Control From Afar

Away from home? Set your phone or tablet as a home hub to control devices you plug in the POWR2 switch remotely

“Speak to” Your Appliances

Seamlessly compatible with Amazon Alexa and Google Assistant, turn on or off your appliances with your voice command, release your hands

“Hey, Google...”

“Okay”

Limited Time for Unlimited Peace of Mind

Worry that there are a ton of connected devices posing serious threats if left unattended. Now, you totally get rid of the troublesome. They will automatically turn off at a scheduled time as long as you set a timer on the app

Follow Real-time Power Consumption

Monitor the power, current and voltage of devices you plug-in and provide real-time reports on how much energy they're consuming

Safety Goes with You, Always

Features the overload protection, which allows you to set the real-time power, voltage and threshold current. Once beyond the set value, it will automatically turn off to ensure your devices are secure

More POWR2 Can Do

Share devices with your family, sync status of devices, allow you to set more smart scenes for any space and work with IFTTT, designed to simplify your home, smarten your life
